

Des fiches cartonnées pour enseigner la soustraction (contextes de retrait et de comparaison)

On trouve ici 31 cartons.

Six favorisent le **calcul d'une soustraction dans un contexte de retrait** :

- 3 cartons notés **À partir de la séquence 14** et au verso rouge, à découper en demi-cartons.
- 3 cartons notés **À partir de la séquence 23** et au verso rose, à découper en demi-cartons.

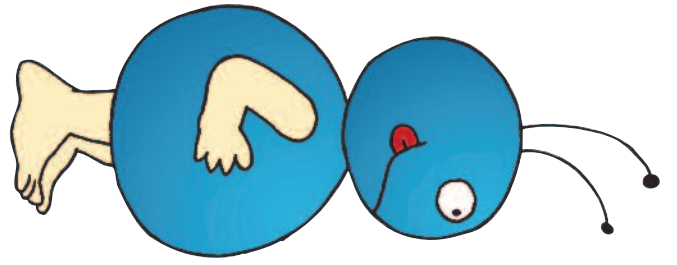

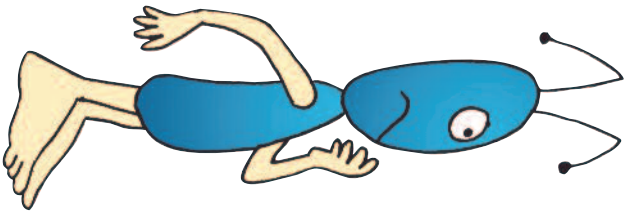

Les 25 autres permettent de travailler la soustraction **dans un contexte de comparaison** :

- 9 cartons notés **À partir de la séquence 4** sur le recto et **À partir de la séquence 30** sur le verso.
- 9 cartons notés **À partir de la séquence 6** sur le recto et **À partir de la séquence 44** sur le verso.
- 7 cartons notés **À partir de la séquence 30** sur le recto et **À partir de la séquence 44** sur le verso.

Ces cartons font travailler l'anticipation du résultat d'une correspondance terme à terme.

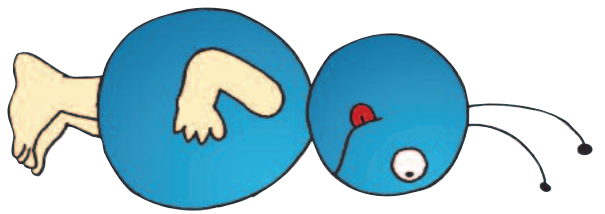

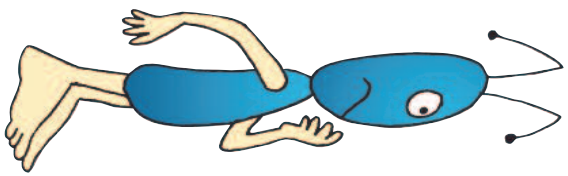

Lors de la phase de vérification des réponses (qu'on appelle aussi « validation »), il peut être souhaitable de réaliser réellement la correspondance terme à terme. C'est pourquoi il convient de mettre les cartons dans une pochette plastique transparente et bien lisse permettant l'emploi d'un feutre effaçable.

Par ailleurs, les cartons étant imprimés recto-verso, il convient de glisser une feuille opaque au verso afin d'éviter que les élèves ne soient distraits par la situation visible au verso.
